About

- I am a dedicated student at SLIIT with a strong interest in full-stack development. Proficient in various languages and frameworks such as React and Express, I excel in enhancing user experiences and am adept at database management. My objective is to apply my expertise to dynamic projects that challenge and inspire, leveraging strong problem-solving abilities, a commitment to excellence, and effective teamwork skills. I thrive in both independent and collaborative environments across a wide range of technologies. Additionally, I enjoy sharing my knowledge by teaching programming topics to peers. My ambition is to develop innovative products that create a positive impact globally

Education

Feb 2011 - Dec 2017

- O/L
St.Thoma's College , Bandarawela

Jul 2018 - Sep 2020

- A/L
Al-Adan Maha Vidiyalaya , Badulla

Jul 2022 - Present

- BSc(Hons) in Information Technology Specialising in Information Technology
SLIIT , Malabe

Skills

- Programming Language**
Java | C++ | SQL | Python | Javascript
- Front-end**
React | HTML | CSS | Tailwind
- Back-end**
Node js | Express
- Database**
MongoDB | My SQL Workbench
- Developer Tools**
VS Code | Git Hub | PyCharm | Figma | Postman | Draw io
- Other Tools**
Photoshop | Illustrator | Filmora | DaVinci Resolve

Qualities

- Decision Marker
- Problem Solving
- Multi Tasking
- Time Management

Projects

Jan 2023 - Jun 2023

■ Property management

[HTML](#) | [CSS](#) | [PHP](#) | [My SQL](#)

I developed a property management website using HTML, CSS, PHP, and MySQL. This platform features full CRUD operations, user authentication, and secure payment options. It allows customers to buy or sell properties seamlessly, with an admin dashboard for managing listings, user accounts, and overall operations, ensuring a smooth and secure experience for all users.

Jul 2023 - Dec 2023

■ Propertix - Property management

[HTML](#) | [CSS](#) | [Java](#) | [My SQL](#)

I developed the logo for this project and worked on some parts of the user interface. This Java-based project utilizes Java and MySQL Workbench for the backend, while HTML and CSS are used for the front end. The project includes CRUD operations, allowing users to buy or sell property. It also features user authentication, with admin management of user and property details. Additionally, we have ensured a nice and smooth interface for users.

Jan 2024 - Jun 2024

■ Fresh Leaf - Tea leaves sale and management

[React](#) | [Tailwind](#) | [Node js](#) | [Express js](#) | [MongoDB](#)

In this project, I developed the logo and most of the UI for a MERN-based web application designed for tea sales and management. We utilized Tailwind CSS for styling to create an attractive, nice, and smooth user interface. The web app includes various management systems such as inventory management, user management, product management, and authentication. Additionally, it features a special capability for the owner to download all user and product details in both PDF and Excel formats.
