About

I am a dedicated student at SLIIT with a strong interest in full-stack development. Proficient in various languages and frameworks such as React and Express, I excel in enhancing user experiences and am adept at database management. My objective is to apply my expertise to dynamic projects that challenge and inspire, leveraging strong problem-solving abilities, a commitment to excellence, and effective teamwork skills. I thrive in both independent and collaborative environments across a wide range of technologies. Additionally, I enjoy sharing my knowledge by teaching programming topics to peers. My ambition is to develop innovative products that create a positive impact globally

Education

Feb 2011 - Dec 2017

O/L
St.Thoma's College , Bandarawela

Jul 2018 - Sep 2020

A/L
Al-Adan Maha Vidiyalaya , Badulla

Jul 2022 - Present

BSc(Hons) in Information Technology Specialising in Information Technology
SLIIT , Malabe

Skills

Programming Language
Java | C++ | SQL | Javascript

Front-end
React| HTML | CSS | Tailwind

Back-end
Node js | Express | Springboot

Database
MongoDB | My SQL | Post SQL

Data Structures and Algorithms
Stack | Queues | Linked List | Bubble Sort | Insertion Sort | Heap Sort

Developer Tools
VS Code | Git Hub | PyCharm | Figma | Postman | Draw io

Other Tools
Photoshop | Illustrator | Filmora

Certification

Certification in online Designer

The Business School Holdings (Pvt) Ltd
Practicing graphic design using Illustrator and Photoshop on real-world projects.

Experience

Jan 2021 - Feb 2023

Freelance Graphic Designer

Specializing in logo design, flyer creation, and poster development, I excel in using Photoshop and Illustrator for high-quality edits and retouching. My expertise in these tools allows me to deliver visually compelling designs that enhance brand identity and marketing efforts.

Projects

RivoWeb- E-commerce application

React | Tailwind| Spring boot | My SQL

This application is built with React and Tailwind CSS for a modern and visually appealing front-end, while the back-end is powered by Spring Boot.
It features role-based authentication to ensure secure access and includes a basic CRUD system for managing product details. The back-end implements token-based authentication, with custom token creation, security configuration, and API filtering to allow only authorized requests.

Rivo- E-commerce application

React | Tailwind | Node js | Express js | MongoDB

This project application is a feature-rich platform designed with a focus on simplicity and efficiency. It incorporates role-based authentication to ensure secure access control, allowing administrators and users to have distinct privileges based on their roles. The platform supports image uploading to enhance content presentation, such as attaching images to products or profiles. Additionally, it features a basic CRUD system also

Fresh Leaf - Tea leaves sale and management

React | Tailwind | Node js | Express js | MongoDB

In this project, I developed the logo and most of the UI for a MERN-based web application designed for tea sales and management. We utilized Tailwind CSS for styling to create an attractive, nice, and smooth user interface. The web app includes various management systems such as inventory management, user management, product management, and authentication. Additionally, it features a special capability for the owner to download all user and product details in both PDF and Excel formats..

Doctor Appointment- Booking doctor website

React | Tailwind | Node js | Express js | MongoDB

I developed a doctor appointment website using MERN stack technology.
The platform allows users to find doctors, view detailed profiles, and securely pay to book appointments. It offers a seamless user experience for scheduling healthcare services..

Qualities

Decision Marker

Multi Tasking

Problem Solving

Time Management
